

**User manual**  
**Pelican mobile**

A handmade wooden toy for the little ones.

Please pay attention to shape of the wings while assembling. Front and back are different.

3. Push the legs into place and tighten until they are stuck. Glue them with some wood glue if they are too loose.

1. Push the connector A into the opening in the center of the bird body and tighten with the screw.

2. Push the wings onto the connector A and align the holes in the connector with these in the wings and push the metal pins through them. Use a hammer in a careful manner if this is difficult.

**Remarks**

1. Due to the condensation of the wood, a part can have a different weight.
2. The bird wings may have slightly different angles.

**WARNINGS**

Not suitable for children under three years.  
 Use under the direct supervision of an adult.

**CAUTION**

Cutting hazard : the product has sharp edges and can cause injury.  
 Always keep the wings away from the fingers and the body.

**CHOKING HAZARD**

Small parts can be swallowed.
